

LEGACY SYSTEM MODERNIZATION PLATFORM

Turn legacy into your AI advantage

Every enterprise is racing to deploy AI - but the business logic and data that make it valuable are locked inside systems it can't reach. OpenLegacy takes enterprises from legacy to AI, one business process at a time.

WHY IT MATTERS

Your legacy is an asset – not a liability

Decades of your most validated business rules and richest records live on mainframes and IBM i systems that were never built to feed enterprise AI. That logic is exactly what your enterprise AI needs to deliver real value - it's just trapped in a black box. OpenLegacy turns that black box into governed, composable services your AI can consume.

Unlock AI at enterprise scale

Make the logic and data in your most complex legacy systems accessible to enterprise AI - exposing only what agents need, so they stay accurate and affordable.

Modernize into any platform

Go all the way to full modernization. Move to the cloud - AWS, Azure, or Google Cloud - or re-platform onto Salesforce, Pega, Java/.NET, or your own stack. Zero disruption, no lock-in.

Both begin the same way - **one business process at a time**. Start small and expand as your goals grow.

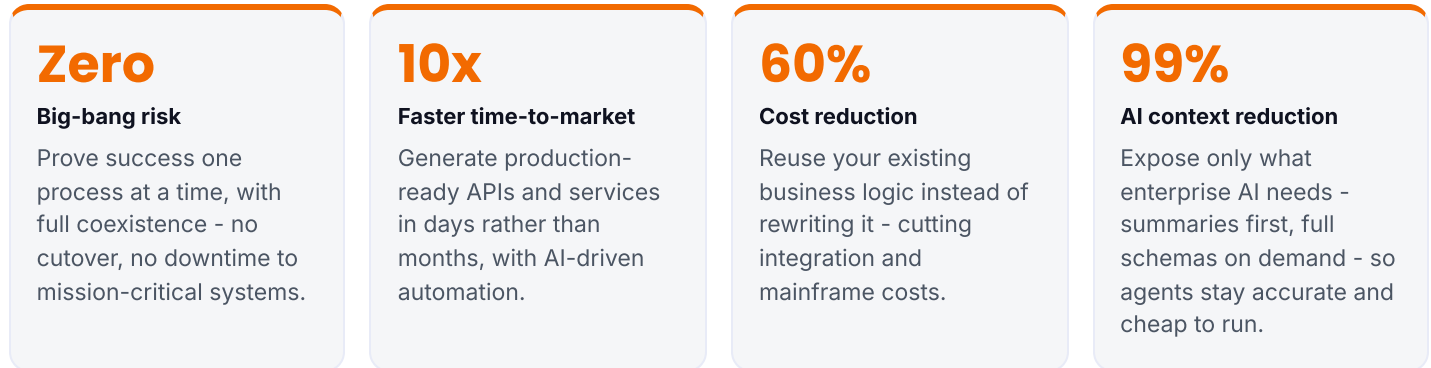

TRUSTED BY GLOBAL TIER-1 ENTERPRISES

THE OPENLEGACY ADVANTAGE

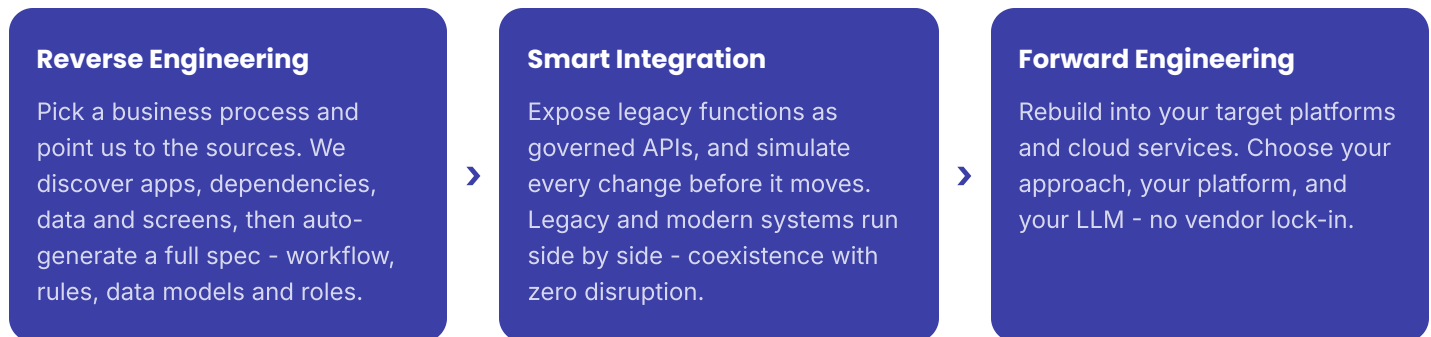

Purpose-built for safe modernization – from legacy to AI

Tangible business value at every step.

HOW IT WORKS

A clean, three-step path – one business process at a time

The result: faster time-to-value with fewer surprises – without a "big-bang" cutover.

The difference is the method.

OpenLegacy works one business process at a time, so every step is proven and reversible. Legacy and modern systems run side by side in full coexistence – no big-bang cutover, no downtime, no threat to the systems your business depends on. It's the fast, incremental, low-risk path enterprises actually need, not an all-or-nothing gamble.

Start where the pressure is highest. Pick one high-value process, prove it in weeks, and expand from there. **Turn the systems slowing you down into the advantage that moves you forward.**
